Subject: FW: Yerington - Monitor Well Jersey Barrier Installation
[removed.txt](#)

Dave,

As I've already mentioned, ARC is in the process of installing additional equipment to mitigate safety concerns identified while contractors were accessing certain monitoring wells at the Yerington site. The anticipated schedule for installing this equipment is described below and we anticipate these wells will be included in the December water level monitoring.

Please let me know if you have any questions.

Thanks,

-jack

Subject: Yerington - Monitor Well Jersey Barrier Installation

Jack,

Broadbent has scheduled an on-site, pre-implementation meeting with Desert Engineering for installation of jersey barriers in vicinity of the stop work wells for December 7, 2016. During the meeting, we will discuss the location of each barrier as well as the safety requirements/protocol. Additionally, we will develop the TRA for implementation of this work. Desert expects to complete the work prior to December 19 which will allow collection of monthly water levels from these wells in December.

Thanks,

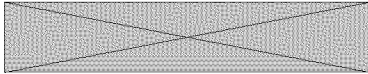

Jeremy Boucher, PE, CEM
